DETAILED ACTION

The instant claims are directed to three different inventive groups, due to the complexities of the claims, the examination of all three groups together become extremely burdensome. Therefore, restrictions are requested as the following.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 6, 7, 12-15, 18, 23, 24, and 27, drawn to a propylene copolymer.

Group II, claim(s) 3-5, 8-11, 17, 21, 22, 26 and 31, drawn to propylene homopolymer.

Group III, claim(s) 28-30, drawn to a catalyst composition.

2. The inventions listed as Groups I--II, I--III, and II--III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

(i) Propylene copolymers of Group I and propylene homopolymers of Group II are two different types of polymers with different repeating units, therefore, they do not share a common technical feature.

(ii) Groups I-III and II-III are related as polymers and catalyst, polymers and catalyst do not share a common technical feature.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Various catalyst Species.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Various catalyst Species are listed in Claims 28-30.

The following claim(s) are generic: no claims are generic.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each catalyst are

Art Unit: 1713

different compounds, pursuant to PCT Rule 13.2 and PCT Administrative Instructions, Annex B, Part 1(f)(I)(B)(2), the species are not art recognized equivalents.

6. Due to the complexity of the restriction requirement, no telephone election was attempted. If the catalyst claims are elected for future examination, applicants are advised to amend claims 28-30 so that the description of the catalyst structure and catalyst structure are consistent.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Caixia Lu whose telephone number is (571) 272-1106. The examiner can normally be reached from 9:00 am to 3:30 pm.
